Kiril KIRILOV

Abstract. The Belogradchik rocks are a world landmark. Thousands of tourists come to Belogradchik to see them. Besides the well-known rocks with their stories and legends, there is another Belogradchik – the unknown and mystical. Alone or in groups are rocks that few people have seen. With its odd shape they nourish the human imagination; they carry people to another world – wonderful and mythical. In this appendix to journal’s ‘literary section’ such rocks will be exhibited.
